## Effects of COVID 19 on your Water Bill

How has COVID 19 affected your family??

Have you been home more? Washing hands and surfaces more? Cooking dinner more? Washing dishes and clothes more? Filled a pool or had a water slide to entertain kids home from school?

Please, be mindful of all these things listed above. They can really add up over a months' time and will reflect an increase on your monthly bill.

## Help Be Our Eyes!

... If you see a leak or water standing where it shouldn't, give us a call 1-601-733-2363. Our staff works diligently to keep leaks repaired!

## Coming Soon...

Construction is almost complete on our NEW well site on Pine Grove Rd. in Magee, MS. It will include a 600 ft. well pumping approximately 500 gallons per minute, an elevated tank, a water treatment plant, and a generator. This will be our second water tower in the Magee service area.

We have been working hard to upgrade our water system. We have started installing new RG3 Radio read meters in some areas. We have completed installation on over 3,000 meters.
